

COCICOLAUNCH — Environment Variables Master Doc

All environment variables for the content-lane projects. Generated 2026-06-28 from live source files.

1. Penthouse Papi (penthouse-papi)

Dashboard: Next.js 16 (port 3090 dev, port 3000 prod) Two env files: root `.env` (scripts/CLI) and `dashboard/.env.local` (Next.js)

1.1 Supabase — Database & Storage

#	Variable	Location	Required	Default	Notes
1	SUPABASE_URL	<code>.env</code>	YES	—	https://your-project.supabase.co
2	SUPABASE_ANON_KEY	<code>.env</code>	YES	—	Public anon key (server-side)
3	SUPABASE_SERVICE_ROLE_KEY	<code>.env</code>	YES	—	Admin/service role key
4	SUPABASE_JWT_SECRET	<code>.env</code>	no	—	JWT signing secret
5	SUPABASE_BUCKET	<code>.env</code>	no	<code>assets</code>	Storage bucket name
6	NEXT_PUBLIC_SUPABASE_URL	<code>.env.local</code>	YES	—	Client-side mirror of #1
7	NEXT_PUBLIC_SUPABASE_ANON_KEY	<code>.env.local</code>	YES	—	Client-side mirror of #2

1.2 LLM / AI Provider

#	Variable	Location	Required	Default	Notes
8	LLM_PROVIDER	<code>.env.local</code>	YES	<code>openrouter</code>	<code>openrouter</code> or <code>openhuman</code>
9	OPENROUTER_API_KEY	<code>.env.local</code>	YES*	—	Required when <code>LLM_PROVIDER=openrouter</code>

#	Variable	Location	Required	Default	Notes
10	OPENHUMAN_CORE_RPC_URL	.env.local	no	http://127.0.0.1:7788/rpc	OpenHuman RPC endpoint
11	OPENHUMAN_CORE_TOKEN	.env.local	no	—	Auth token for OpenHuman
12	OPENHUMAN_DEFAULT_AGENT	.env.local	no	orchestrator	Default agent to invoke
13	OPENHUMAN_SIMPLE_CHAT	.env.local	no	0	Use lighter agent_chat_simple RPC
14	OPENHUMAN_MEMORY_SYNC	.env.local	no	off	Mirror writes to OpenHuman memory tree (on / off)
15	OPENHUMAN_BUSINESS	.env.local	no	helpmecoach	Business line: helpmecoach, coachai-finance, flowbook-saas

1.3 Autoresearch

#	Variable	Location	Required	Default	Notes
16	PERPLEXITY_API_KEY	.env.local	no	—	Competitive intel from Perplexity
17	YOUTUBE_API_KEY	.env.local	no	—	YouTube content analysis

1.4 AI Video Generation

#	Variable	Location	Required	Default	Notes
18	MINIMAX_API_KEY	.env.local	no	—	MiniMax video gen API key
19	MINIMAX_API_BASE	.env.local	no	https://api.minimax.chat	API base URL
20	MINIMAX_MODEL	.env.local	no	video-01	Model name

#	Variable	Location	Required	Default	Notes
	DEL				
21	MMX_CLI_ENABLED	.env.local	no	false	Use local CLI binary instead of API
22	MMX_CLI_PATH	.env.local	no	mmx	Path to MiniMax CLI binary
23	MMX_CLI_TIMEOUT_MS	.env.local	no	120000	CLI timeout in ms
24	SEEDANCE_API_KEY	.env.local	no	—	Seedance video gen API key
25	SEEDANCE_API_BASE	.env.local	no	https://api.seedanceapi.org/v2	API base URL
26	SEEDANCE_MODEL	.env.local	no	seedance-1-lite	Model name

1.5 Distribution & Communication

#	Variable	Location	Required	Default	Notes
27	TELEGRAM_BOT_TOKEN	.env	no	—	Telegram bot for approvals
28	TELEGRAM_CHAT_ID	.env	no	—	Target group or chat ID
29	GHL_API_KEY	.env	no	—	GoHighLevel API key
30	GHL_WEBHOOK_URL	.env	no	—	GHL webhook endpoint
31	SLACK_WEBHOOK_URL	.env	no	—	Optional Slack notifications

1.6 Agent Runtime

#	Variable	Location	Required	Default	Notes
32	NEXT_PUBLIC_OPENFANG_URL	.env.local	no	http://localhost:4200	OpenFang agent runtime URL
33	NEXT_PUBLIC_OPENFANG_API_KEY	.env.local	no	—	OpenFang API key

#	Variable	Location	Required	Default	Notes
34	NEXT_PUBLIC_REMOTION_URL	.env.local	no	http://localhost:3001	Remotion Studio URL

1.7 General

#	Variable	Location	Required	Default	Notes
35	PROJECT_NAME	.env	no	penthouse-papi	Project identifier
36	ENV	.env	no	development	development or production
37	DEBUG	.env	no	true	Enable debug mode
38	LOG_LEVEL	.env	no	info	Log verbosity

Total: 38 variables (7 required, 31 optional)

2. Flowbook (f lowbook)

Multi-channel conversational AI bot. Docker-based deploy on Coolify VPS (163.245.195.174). Single .env file + per-service env in docker-compose.coolify.yml and patch.

2.1 Core Platform — Tiledesk Stack

#	Variable	Required	Default	Notes
1	TILEDESK_JWT_KEY	YES	—	JWT secret for Tiledesk server API auth
2	TILEDESK_PROJECT_ID	YES	—	Tiledesk project ID (used by all webhooks)
3	TILEDESK_JWT_TOKEN	YES	—	Admin JWT for Tiledesk API calls
4	RABBITMQ_USER	no	f lowbook	RabbitMQ MQTT broker user
5	RABBITMQ_PAS S	no	f lowbook2026	RabbitMQ MQTT broker password
6	PUBLIC_URL	YES	http://163.245.195.174:8081/	Public-facing server URL

#	Variable	Required	Default	Notes
7	PUBLIC_HOST	YES	163.245.195.174	Public-facing hostname

2.2 Channel: WhatsApp (Evolution API)

#	Variable	Required	Default	Notes
8	EVOLUTION_API_URL	YES	—	Evolution API endpoint
9	EVOLUTION_API_KEY	YES	—	Evolution API key
10	EVOLUTION_INSTANCE_NAME	no	flowbook	WhatsApp instance name

2.3 Channel: Facebook Messenger + Instagram

#	Variable	Required	Default	Notes
11	FB_PAGE_ACCESS_TOKEN	YES	—	Facebook Page access token
12	FB_VERIFY_TOKEN	YES	—	Webhook verification token
13	FB_APP_SECRET	YES	—	Facebook App secret
14	IG_PAGE_ACCESS_TOKEN	no	—	Instagram Page access token

2.4 Channel: X / Twitter

#	Variable	Required	Default	Notes
15	FLOWBOOK_X_API_SECRET	YES	—	CRC validation secret for Twitter webhook

2.5 Channel: LinkedIn

No LinkedIn-specific env vars beyond the shared Tiledesk vars (#2, #3).

2.6 Channel: SMS (Twilio)

#	Variable	Required	Default	Notes
16	TWILIO_ACCOUNT_SID	YES	—	Twilio account SID

#	Variable	Required	Default	Notes
17	TWILIO_AUTH_TOKEN	YES	—	Twilio auth token
18	TWILIO_FROM_NUMBER	YES	—	Outbound SMS phone number
19	TWILIO_MESSAGING_SERVICE_SID	no	—	Twilio messaging service
20	FLOWBOOK_SMS_REPLY_TOKEN	no	—	Reply authentication token
21	FLOWBOOK_LAUNCH_SMS_APPROVED	no	false	Gate: true to enable outbound SMS
22	SKIP_TWILIO_VALIDATION	no	false	Dev-only: skip signature validation

2.7 Channel: Email (SendGrid)

#	Variable	Required	Default	Notes
23	SENDGRID_API_KEY	YES	—	SendGrid API key
24	SENDGRID_FROM_EMAIL	YES	—	Sender email address
25	SENDGRID_FROM_NAME	no	CoachAI Tech Camps	Sender display name
26	SENDGRID_REPLY_TO	no	—	Reply-to email address
27	SENDGRID_EVENT_WEBHOOK_PUBLIC_KEY	no	—	Event webhook verification key
28	FLOWBOOK_EMAIL_REPLY_TOKEN	no	—	Reply authentication token
29	FLOWBOOK_LAUNCH_EMAIL_APPROVED	no	false	Gate: true to enable outbound email
30	LAUNCH_TEAM_ACTIVE_CAMPAIGN_ID	no	coachai-private-lender-ai-desk-launch	Active marketing campaign
31	LAUNCH_TEAM_ACTIVE_OFFER	no	coachai-lender-desk-	Active offer

#	Variable	Required	Default	Notes
	_ID		implementation	
32	LAUNCH_TEAM_PRIMARY_CTA	no	book_lender_ai_workflow_audit	Primary CTA slug

2.8 AI Backend — OpenHuman

#	Variable	Required	Default	Notes
33	ADAPTER_TOKEN	YES	—	Auth token for OpenHuman adapter (auto-generated by deploy script)
34	OPENHUMAN_CORE_TOKEN	YES	—	Auth token for OpenHuman headless core (auto-generated by deploy script)

Total: 34 variables (17 required, 17 optional)

3. Shared Infrastructure (Supabase)

Both projects read/write the same Supabase instance. The tables live in the `penthouse-papi` repo schema:

```
penthouse-papi/supabase/schema.sql
→ concepts
→ calendar
→ video_assets
→ approvals
→ performance
```

Flowbook reads published content from these tables to serve via conversational AI channels.

4. Quick Setup

Penthouse Papi (local dev)

```
cp .env.example .env
cp dashboard/.env.example dashboard/.env.local
# Edit both files with real keys
npm install --prefix dashboard
npm run dev --prefix dashboard # → http://localhost:3090
```

Flowbook (production VPS)

```
# On the Coolify VPS (163.245.195.174):  
# 1. Populate .env with all required vars  
# 2. Run the deploy script:  
./deploy-flowbook-2.sh  
# Dashboard: https://flowbook.tech/studio
```
